

Navigation Fly-In Menu

The Navigation Fly-in Menu and its icon-driven options are the heart of the responsive user interface. This is a breakdown of all the various options and how they map to the Classic user interface. You have control over which icons display and you should note which icons display dynamically based on user managerial status and roles. Most functions will still be available for administrative users even if access is hidden from the Student/Manager interface.

Portal administrators may display or hide icons here: **Administration > Site Management > [Edit Navigation](#)**.

Icons dependent on roles or managerial status will be designated in their description below as **Dynamic**.

Navigation Icon	Description & Usage	Classic UI Equivalent
Account 	Users can maintain some elements of their account. For portals using Two-Factor Authentication , challenge questions are available for edit. If you do not want users to change their own account information, or for SSO- or feed-managed users hide this option. This does not impact user account maintenance for portal administrators.
